Registered Business

• CARBON TRUST - 'Carbon Trust Funding'

Saunders Specialised Services are registered with the Carbon Trust Energy-Efficiency loans Scheme. We can act on your behalf to commence an application for an unsecured interest free loan between £3,000 and £400,000. These 0% loans can be for up to a 4-

year period, and are available to allow you to undertake energy saving projects that will reduce your energy costs. Replacement boiler and hot water plant, replacement air conditioning, heat recovery systems, energy saving lighting and controls, replacement motors & drives and many other applications are eligible for the scheme. Why not give us a call, we can assist you with the entire process, from application to design, installation and commissioning. Once installed, you will instantly start saving money, while also dramatically reducing your carbon footprint, give it a go, and do your bit for the environment.

• FARNHAM CASTLE - 'Its just Keeps going and going'

Dating back to the 12th Century, **Farnham Castle** is one of the most important historical buildings in the South of England. A lot has changed at Farnham Castle over the last 900 years. For 800 years the Bishops of Winchester used the Castle as a home and administration centre, now it offers a modern International Briefing and Conference Centre, and is a first class venue for corporate functions or any special occasion. Farnham Castle is a complex mixture of Grade I and Grade II listed buildings. Working in the Castle can present interesting challenges. In 2008 we installed 380Kw of **Powmatic** gas fired energy efficient commercial boilers for the main building, in 2009 we have recently completed the installation of new Stokvis commercial boilers and water heaters for the guest wings. Never mind the *Norman Conquest*, this has been another *Saunders Conquest*.

• PORTSMOUTH HISTORIC DOCKS - 'Victory is ours!'

Portsmouth Historic Dockyard is a fantastic place to experience 800 years of Naval history. It offers a great mixture of working docks, world famous historic ships including HMS Victory, HMS Warrior and of course the Mary Rose. There are also many historic buildings including the unique building Boathouse 7. When two of the 100kw warm air heaters manufactured by **Mark** failed, Saunders were chosen to install the replacement gas fired commercial heater units. Saunders Specialised Services regularly install and maintain gas fired and oil fired commercial heaters from 15Kw up to 2,000Kw. So whatever your heating requirements you can be assured of a *Victory-ous* result with our engineers on board.

• SCHOOLS OUT - 'BUT NOT FOR SAUNDERS!'

The summer break can be a busy time for our engineers. Saunders Specialised Services regularly carry out servicing and maintenance to all types of gas fired and oil fired boilers, water heaters, catering equipment as well as air conditioning units for many schools around the South of England. For a free quotation for servicing or replacement boilers, water heaters, specialist controls and air conditioning equipment why not give us a call, as these schools have:

- Royal Grammar School
- Highfield School
- Prebendal School
- Ditcham Park School
- Bedales School
- St. Nicholas' School
- Braganza School
- Dorset House School

• CHATSWORTH HOTEL - 'Greener Tourism by Ideal'

Chatsworth Hotel is one of the finest hotels Worthing and the South Coast have to offer. This most prestigious hotel offers 98 en-suite bedrooms, function rooms, conference rooms and first class restaurants and bars. The 19th Century Grade II listed Georgian hotel is a member of the Green Tourism Business Scheme. Working with the assistance and funding from the Carbon Trust, Saunders are about to embark upon the installation of four 200Kw **Ideal Imax** gas fired condensing commercial boilers and seven high recovery hot water calorifiers manufactured by **MHS**. This replacement plant will significantly reduce the annual energy consumption while also reducing the impact of the business on the environment.

• BRIGHTON UNIVERSITY - 'Blowing hot and cold'

Some like it hot! In the Queenwood building IT suite, wall mounted warm air convector heating has been plumbed, wired and installed by Saunders, ready for the winter months. What ever form of heating you may have or require, either heat pumps, warm air, electrical radiant, gas radiant, underfloor or radiators we can design, install and maintain it for you.

University of Brighton

Cool it! Those were our instructions for the kitchen stores at the Mithras building. So we did. **Daikin air-conditioning** has now been installed to overcome high temperatures in the stores areas. This modern energy efficient inverter driven heat pump equipment now provides heating or cooling all year round to maintain a constant temperature as required.

• PORTSMOUTH CITY COUNCIL - 'Sporty Saunders'

Hard hats, safety boots, harnesses and lanyards are not normally the first choice of sports wear for most people spending a week in a sports hall, but when we installed 80kw of replacement gas fired radiant tube heating at high level, that's what was required of our engineers when they installed the new heating equipment manufactured by **Roberts Gordon**. At the same time as the heating installation, Saunders also installed replacement MEM 3-phase electrical Distribution Boards and equipment with our NICEIC registered electrical installation team.

• GOODWOOD PARK HOTEL - 'In the Downs'

Goodwood Park Hotel is set at the foot of the Sussex Downs. Home to the Dukes of Richmond for 300 years, Goodwood is synonymous with warm hospitality and service to the highest standards. The hotel offers first class accommodation, an indoor pool, spa, two golf courses, and is an ideal venue for weddings and special occasions.

To ensure customer satisfaction is guaranteed, Saunders have installed high efficiency boilers and high recovery **Gemini** hot water generation equipment manufactured by **MHS**. The replacement boilers will substantially reduce the annual running costs for the 330Kw plant.

• GOODWOOD FESTIVAL OF SPEED - 'All Revved Up'

Once again Saunders Specialised Services were on hand to install the electrical services required to support this fantastic Motorsport event, including assisting this years main sponsor Audi. Since the inaugural event in 1993, our team of electricians have raced around installing all of the essential electrical services required for the hospitality suites, race paddocks and catering outlets, while also working with race teams such as McLaren and Prodrive. Saunders Specialised Services regularly cater for small one-off events upto some of the largest events held in Europe.

• HILTON HOTELS - 'Travel takes you places'

As their advertising says - Travel takes you places - well so does servicing and maintenance. Detailed below are just some of the activities we have carried out recently for the Hilton Group.

Brighton Metropole - Servicing and repairs to Beaumont water heaters.

Hilton Portsmouth - Servicing and repairs to boilers, hot water generation equipment and air conditioning.

Hilton Avisford Park - Replacement commercial Powmatic boilers, servicing and repairs to heating and hot water plant. Installation of new Sanyo air conditioning equipment.

• NHS - 'Action Direct'

There is far more to the **NHS** than just hospitals and clinics. Behind the scenes there are many other facilities that provide vital support. One such building in Worthing now benefits from the installation of new **AmbiRad** radiant tube heating. The project was designed and installed by our own engineers, who carried out the full electrical and gas installations as required.

• LAKESIDE - 'A FISHY TALE'

Surrounded by 10 fishing lakes in over 150 acres, **Chichester Lakeside Holiday Park** is a great location for family fun and entertainment in West Sussex. We are pleased to announce that Saunders Specialised Services have been awarded the annual servicing contract to maintain the oil fired boilers and LPG water heaters and pool boiler. This has been carried out by our **OFTEC and Gas Safe** registered commercial service engineers. Swimming pool boilers are one of our specialities, whatever the make. We have also recently installed replacement direct-fired **Lochinvar** water heating to ensure customer satisfaction is guaranteed at this first class facility.
