We are a registered company with the Heating and Ventilation Contractors Association (HVCA), Confederation of Registered Gas Installers (Corgi) and Sussex Enterprise.

## • 'A LOAD OF HOT AIR'

Saunders Specialised Services successfully designed and installed a high level warm air system for Wiley Publishers in Bognor Regis during the Autumn.

The project included ten Ambirad gas unit heaters and twelve de-stratification fans giving a uniform temperature throughout their storage facility.

Wiley's were impressed and quoted they were pleased to work with such an efficient and professional company`.

Wiley Publishers were founded in 1807 making our 44 year old company seem young in comparison.

The project ran smoothly and was handed over on time prior to the winter months. Another successful hot air installation.

## • 'REV EM UP'

**Saunders Specialised Services once again was on hand to work in conjunction with Goodwood for its annual Festival of Speed and Revival. Using our trusty fleet of modern Fords we revved up to meet the demands of the three day events and its numerous visitors.**

**For the 14th year we once again provided the temporary electrical supplies to the marquees, exhibitor halls and food stalls across the race circuit and grounds, all done in a short space of time. The works called for strict programming and coordination and was a roaring success.**

## • 'You smell nice'

Building on our maintenance division, we are pleased to link up with The Body Shop for the servicing and maintenance of all their head office and production facilities in Sussex. This multi year contract covers all mechanical and electrical appliances ensuring the customer piece of mind in their daily operation.

The Body Shop was established in 1976 just a few miles from Saunders Specialised Services Ltd. We have pleasure in linking up with them.

## • What's so funny?

We are pleased to announce we once again we will be the main sponsor of the European and National Championship Event winning team campaigned by the 'Jones & Friend' Funny Bike Drag Racing Team. The combination of the rider Gary Jones and crew chief Dave Friend will be looking to speed down the quarter mile drag strip at over 200 mph in 6 seconds with the aid of the unique electronic fuel injected, turbo charged, methanol burning funny bike they have developed together.

## • 'PULL UP THE DRAWBRIDGE'

We made many new friends in 2006, amongst them being Farnham Castle in Surrey. Built in 1138 by Henry Blois, it provided accommodation for his frequent trips between his cathedral and the capital and served as residence for several Bishops up until 1955. Today it is a provider for International companies in conference facilities.

Saunders Specialised Services Ltd have had the pleasure of providing new office, reception and dining room radiator circuits as well as the maintenance of all their heating plant during 2006. We must have done something right as they haven't locked us up yet.

## • 'Doctors keep their cool'

## • 'Students liking for Ribena'

It made us laugh to learn that students at the Royal Grammer School in Guildford have a liking to Ribena. As a Christmas prank they poured litres of the stuff into the cold water storage tanks leading to Ribena coming out of all the taps, toilets and showers ! For several years now we have enjoyed the service contract on the seven school site boilers and heaters. The Royal School was founded in 1509 and has a variety of boiler plant in several buildings including gymnasias, laboratories, classrooms and pool halls.

## • 'Keep the kids warm'

With the criteria of keeping the floor space clear and safe for the child care groups (as well as keeping them warm) Saunders Specialised Services designed and installed a Radiant Heating system for Haywards Heath Church Hall using six ceiling mounted Alfaheat AS24 heaters all wired centrally to a flexible automatic control system.

The heaters provide a fast heat up time and give the occupants a comfortable and energy efficient heating system using Scandinavian technology.

## • Have you been Scumballed?

2006 saw the extremely successful inaugural fund raising charity event **THE SCUMBALL 3000** which Saunders Specialised Services were proud to be one of the major contributing sponsors. The 2006 event raised over £20,000 on behalf of the Sussex Snowdrop Trust and the charity chosen for the 2007 rally is Winston's Wish.

For further information on Europe's premier charity rally please visit [www.scumball3000.co.uk](http://www.scumball3000.co.uk) and [www.winstonswish.org.uk](http://www.winstonswish.org.uk)

## • 'Another Victory'

One of the most fascinating projects we took on this year was at the Portsmouth Historic Docks, home to the Victory and Mary Rose. One of the historic buildings had heating controls issues which our electrical department rectified via the installation of a new automated control system. Saunders Specialised Services Ltd has worked at the Historic Dock yard on several occasions during 2006 surrounded by some impressive history. Even the Queen approved, visiting the Docks last November.

## • 'ANY OTHER NEWS ?'

Yes, we have moved. Our old offices and storage became a little tight so we have moved to purpose built facilities on the edge of Chichester. With this comes the appointment of a new Director, Eric Humphrey. Eric has worked in Sussex for over 25 years and brings management and electrical design knowledge to the company. The accounts department has also been upgraded with new computer and banking facilities giving us the latest technology available. The accounts department will be headed up by Jacqui Voke who joined us in early 2006 and is also ably assisted by Ruth Dutfield.

**Arundel Doctors Surgery have taken steps to keep their cool during the summer periods with the installation of 22 Daikin Inverter Split Systems to their modern medical centre in the heart of the town.**

**The installation took place in mid 2006 and considered the building aesthetics and occupant demands. The Daikin systems provide climate control with integral photocatalytic deodorising air filters providing high standards of thermal comfort to a demanding facility.**

**From now on, the Doctors and patients of Arundel will at least keep their cool during the summer.**
